Subject: *Solenoid ID and Interchange*

Application: *2003-On Ford HD Trucks*

Issue Date: *December, 2012*

Torqshift

Solenoid ID and Interchange

Use the following figures to identify Torqshift solenoid locations. If you suspect a problem with a solenoid you can interchange it with another to aid in diagnosis.

Solenoids TCC, SSPC-B, SSPC-C and SSPC-E solenoids can be interchanged with one another. Those solenoids are marked with a square in the figure. They cannot be interchanged with any other solenoids. Solenoids SSPC-A and SSPC-D can be interchanged with one another. Those solenoids are marked with a circle in the figure. They cannot be interchanged with any other solenoids.

The PCA solenoid is not interchangeable with any of the other solenoids.

Torqshift Solenoid ID and Interchange

#1305a

The solenoids marked with the rectangles are interchangeable, as are the ones with the circle.

Not interchangeable with any other solenoids
